

ENVIRONMENT PROTECTION POLICY

Protection of the environment is integrated in every process in our Company, based on the Requirements of the Standard **ISO 14001:2015**.

Fundamental principles of Environment at Euronickel Industries DOO Kavadarci are:

- To identify, assess and decrease any impacts and risks to the environment potentially generated from our activities;
- To continually improve our Environment (air, water, soil);
- To comply with all National and European laws and regulations on environmental protection.

In order to comply with these fundamental principles, we engage ourselves to:

- Identify all aspects of environment, to control and monitor all significant aspects;
- Define and implement internal rules, which are not foreseen within the actual legislations, but are determined in order to improve the system for management of environmental protection;
- Develop environmental awareness through communication and training of our Employees to act preventively and continuous improvement of environment protection;
- Save resources and energy, in accordance with Sustainable Development principles;
- Take into consideration opinions and suggestions of all stakeholders and undertake adequate measures for the purpose of improving environmental protection.

Scope of application: Nickel ore processing and production of ferronickel.
